INDIA INTERNATIONAL DEFENCE TECHNOLOGY 2022 EXPO , SUMMIT AND AWARDS

The INDIA INTERNATIONAL Defence Technology Summit (iiDefTech) is a unique gathering of global thought leaders from government, industry, academia, and think tanks, to network, confer, and collaborate in the development of defence and security capabilities. The inaugural 2022 iiDefTech will kick off with a discourse on the impact of the 4th Industrial Revolution on defence. Recently, the world has witnessed unprecedented disruptions. These disruptions have originated from diverse areas such as technology, geo-politics and health, and they have rippling effects because of the deep, interdependent linkages in the world today.

We have seen first-hand how the COVID-19 pandemic has impacted the economy, exposed vulnerabilities in supply chains, military operations, and accelerated the pace of digitalisation worldwide. As in many cases, technology is often front and centre - it may be a source of disruption, an amplifier or a solution provider. iiDefTech 2022 will examine the impact of recent disruptions to government organisations and industries, postulate new disruptors and vulnerabilities arising from an interconnected but bifurcated world, discuss how to organise themselves to prepare for future disruptions, and perhaps even seize unexpected opportunities for growth that come from it.

Provides opportunities to manufacturers to demonstrate products to the potential customer and investors. In this show Exhibitors are likely to showcase their products using latest technologies to the potential customers. This is an important event likely to be attended by thousands of business visitors. The feature will be breakout B2B sessions where the potential supply chain partners from the Overseas – Indian Large – Medium – Small – Micro & Start-up segment can meet up and exchange details.

Overseas & Indian Defence manufacturers are expected to showcase their requirements in the Exhibition. IDT 2022 will focus on huge requirements in the Defence sector, both from the DPSU & Private manufacturers and there is good scope to meet the base workshop / consumables requirements of the Army, Navy, Air force and BSF, which the Expo would like the MSMEs to utilize. With Department of Defence Production targeting 35,000 Crore Export Target by the year 2023-24 together with around 51,000 Crores offset obligation opportunities, there is tremendous scope for Indian Industries, particularly the MSMEs, to utilize this opportunity. Similarly with the Department of Defence Production aiming for 90000 Crore Defence Production for the current year, here too there is tremendous scope for Indian Industries.

INDIAN DEFENCE INDUSTRY

India's defence manufacturing sector has been witnessing a CAGR of 3.9% between 2016 and 2020. The Indian government has set the defence production target at US\$ 25.00 billion by 2025 (including US\$ 5 billion from exports by 2025). Defence exports in India were estimated to be at US\$ 1.29 billion in 2019-20. India's defence import value stood at US\$ 463 million for Fy20 and is expected to be at US\$ 469.5 million in Fy21. Defence export in the country witnessed strong growth in the last two years. India targets to export military hardware worth US\$ 5 Billion (Rs. 35,000 crore) in the next 5 years.

As of 2019, India ranked 19th in the list of top defence exporters in the world by exporting defence products to 42 countries.

Objectives of India Defence Technology

- To connect MSMEs to Indian Defence Manufacturing majors, R&D institutions under DRDO, DPSUs and Defence Services.
- To build and harness the Capacity and Capability of MSMEs to cater for the needs of the Defence technology sector.
- To create a broad and sustainable Supply Chain base for a vibrant MSME sector to cater for the existing and futuristic need for products and technology for domestic and export opportunities in the Defence sector.
- To provide a forum for MSME, Defence and Technology sectors to interact and identify mutually beneficial areas of business opportunities.
- To enable an eco-system for Innovation by promoting Start-Ups and Academia-Industry collaborations.

Attendees & Participants

- Aero Space & Defense
- Internal Security, Police & Civil Defense
- Armored & Special Purpose Vehicles
- Emergency, Disaster & Rescue Management
- Arms & Ammunition
- Forensic & Investigation Technology
- Border Control
- Surveillance & Tracking System
- Traffic Systems / Transport Security
- Communication, IT and Cyber safety
- Access Control
- Fire Fighting
- Occupational Safety & Security
- Welfare Sports & Healthcare
- Tactical Gear & Outdoor Products
- Radio/Satcom/Telecom/Wireless Solution
- Radar/Guided Systems / GPS
- Naval Equipment & Technology
- UAV/UGV/Unmanned Solutions
- Boats/Ship/Maritime Technology & many more.

Visitor Profile

- Officials from Ministry of Home Affairs & Ministry of Defence Top-ranking officers from the Army, Navy & Air force
- 28 States Police & 8 Union Territories Police
- Central Armed Police Forces & Specialized Forces:
