[Aluminium Output in March Likely to be Affected by Previous Production Cuts](#) (Click to read full story)

Date: March 09, 2023

Keyword: Aluminium Industry

The previous production reduction in Yunnan will gradually be reflected in the aluminium output in March. Although the operating capacity in Guizhou and Sichuan is expected to resume, it will make little contribution to production. The average daily output will decline. According to the capacity changes, the domestic operating capacity of aluminium may recover to around 40.19 million mt at the end of March and output in March (31 days) is expected to increase 2.2% YoY to 3.39 million mt. On the demand side, in February, domestic downstream demand recovered, hence the new orders and monthly output of aluminium producers improved on the month.

[Growth at LMG Hoym: ground-breaking ceremony for a new production hall - 50-million euro investment and major order win](#) (Click to read full story)

Date: March 10, 2023

Keyword: Aluminium Industry

Contrary to current trends in the aluminium industry, LMG Manufacturing GmbH in Seeland/Hoym is expanding its production and investing 50 million euros in a new production hall with four production lines. The expansion will create around 120 additional jobs and strengthen the company in the long term. LMG Hoym is resolute in transforming the automotive sector -- moving it away from the world of combustion engines -- and will become a supplier of aluminium die-cast parts for e-vehicles.

Keyword: Aluminium Industry

Since time immemorial, India has remained the hub of climate protection and environmental sustainability. A substantial chunk of folklore literature and practices geared at taking a holistic view of the natural resources remain the solid foundation on which the mainstream narrative of Indian society is built. However, there has been a renewed focus over climate protection in the recent past. India's international image has been on the path of widening its reach and clout of late, and now India has assumed the G20 Presidency.
