[India: GST reforms to benefit aluminium, copper sectors | BigMint](#)

The GST Council, in its 56th meeting chaired by Union Finance Minister Nirmala Sitharaman, has announced major tax relief measures for aluminium and copper products, aiming to boost demand, support households, and strengthen small-scale enterprises.

One of the key changes is the reduction of GST rates on aluminium and copper household articles -- such as tables, kitchenware, and milk cans -- from 12% to 5%. This move will directly lower retail prices, making essential metal utensils more affordable for households. With consumers increasingly seeking durable and healthier alternatives to plastic, demand for aluminium and copper items is expected to rise. The measure also provides a significant boost to micro, small, and medium enterprises (MSMEs) engaged in manufacturing these goods, by widening their market reach and improving competitiveness.

[Loopholes in CBAM risk EU aluminium competitiveness, warns Hydro](#)

Carbon Border Adjustment Mechanism (CBAM), a European Union (EU) regulation which is designed to put a price on carbon emissions in certain imported goods to subdue emissions, mirroring the EU's Emissions Trading System (ETS), will launch the definitive phase on January 1, 2026. With the launch, CBAM shall expand the market, especially between the domestic producers who are already subject to the EU's ETS, along with the international producers who are not under this. Hydro states certain loopholes to be looked at before CBAM comes into force.
